ANNEXURE 8

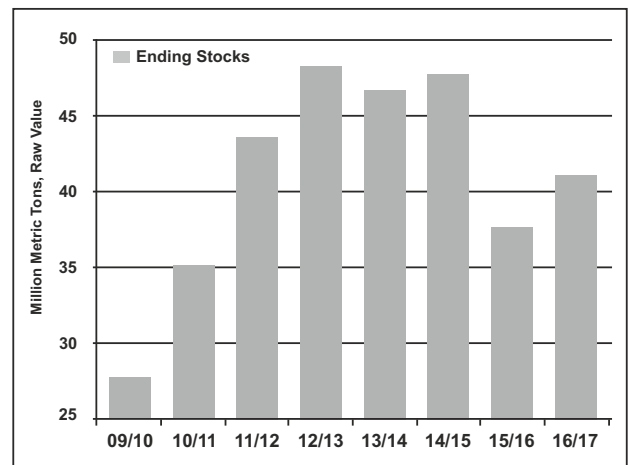

TO BOARD'S REPORT FOR THE YEAR ENDED 31ST MARCH 2016

MANAGEMENT DISCUSSION AND ANALYSIS

Industry Scenario and Development

Global Sugar Outlook

Global consumption for 2016/17 is forecast at a record 174 million metric tons (raw value), exceeding production and drawing stocks down to the lowest level since 2010/11. Production is up 4 million tons to 169 million as gains in Brazil and the European Union more than offset a decline in India. With growing demand, imports are forecast up 1.2 million tons. The rising pace of global consumption has been sustained by drawing down stock levels in recent years. Consequently, stocks are approaching what appear to be historically low levels. In fact, world raw sugar prices, after falling for over a year and bottoming at less than 11 cents per pound in August 2015, are trending higher to near 17 cents in May 2016. As prices react to high demand and as the Brazilian Real struggles to find equilibrium against the US Dollar, higher market returns are needed to provide incentives for producers to catch up with demand.

Sugar Sector in India

India, the world's second- largest sugar producer, may harvest the smallest crop in seven years after drought hit cane production. Sugar production in India is likely to fall to about 25 million tonnes in the ongoing 2015-16 sugar season (October- September) from 28.3 million tonnes in the previous year. The decline in Indian output coincides with a shortfall in Thai and Chinese production, setting the stage for first global deficit in six years.

ISMA estimates that the sugar production for the year 2016-17 likely to decline by 7.3% to 23.2 million tons on account of severe fall expected in Maharashtra. Rainfall is forecast to return to above- normal levels this year after recording shortfall of 14 Percent and 12 percent in the previous two years, according to the Indian Meteorological Department.

Sugar prices

Sugar prices internationally and domestically is on the path of recovery after analysts have slashed their production estimates for most sugar producing regions, including India, Thailand, EU and north-east Brazil. Another contributor to the rise in sugar prices has been Brazil's appreciating currency. The South American country is the world's top producer and exporter of sugar and if its output falls, supplies will shrink, leading to a spike in world prices. A weak Real is good for Brazil's exporters. But during this year Brazil's currency appreciated by 15 percent so far against the US dollar - and that has made all the difference. Sugar exports from the country became uncompetitive. Therefore, there was a shortfall in supply. Political turmoil in Brazil, has also enabled the sweet commodity continue to rally in world trade.

Back home, the first back to back shortfall in monsoon rainfall in three decades has left vast tracts of India reeling under severe drought, prompting farmers to reduce cane planting to conserve water for drinking. Maharashtra is staring at a

drastic drop in sugarcane planting for the 2016-17 season. With water levels depleting at an alarming rate in the state dams, plantation for the season is likely to be hit by up to 30%. Mills in Marathwada, Solapur and Ahmednagar are badly affected and may not report even 25% production in the 2016-17 sugar season. In Karnataka also, the drought has destroyed 30% of the sugar cane crop leaving lakhs of farmers in a precarious situation. As per ISMA, based on the satellite images of June 2016, the total acreage under sugarcane in the country is estimated to be around 49.91 lakh hectares in 2016-17, down by 5.5% compared to 2014-15 sugar season's cane area of around 52.84 lac ha."

The past 10 months saw a big rally in sugar stocks as realizations improved. Retail prices in India have gone up almost 40 per cent in six months, stabilizing at realistic level from ₹ 26-27 a kg to ₹ 38-40 a kg. The government has asked states to impose stock limits as prices tend to rise sharply when the season is midway. Production subsidy has been withdrawn with effect from 19-May-2016. The mills have exported about 1.4 mt of sugar so far and are likely to ship only 1.5 mt by the end of September.

As estimated by ISMA, there are sufficient sugar stocks in the country for the current and even next year. The closing stock of sugar for the sugar season 2015-16 is estimated in the range of 7-7.5 million tons. The total availability of sugar in the season 2016-17 is estimated to be over 31 million tons, while pegging the domestic consumption at 26 million tons the closing sugar stock is estimated to be around 5 million tons which is sufficient for 2-3 months consumption.

Government Announcements

The central Government in September 2015 notified the mandatory export of 4 million tons of sugar for the 2015-16 season. To improve the physical exports, the Central Government in November 2015 announced a subsidy of ₹ 45 per ton of cane to be paid directly to the farmers on behalf of the mills which have compulsorily exported 80% of their allocated quota. The amount so paid directly shall be adjusted against the cane price payable to the farmers towards FRP. If the sugar mill has a distillery unit attached to it, in addition to the compulsory export, it has to achieve 80 percent of the ethanol production target mandated by the center.

The Production subsidy scheme was withdrawn in May 2016. As the production subsidy scheme was withdrawn before time, the Government extended the subsidy to the sugar mills which have exported at least 50% of their export target (80% of MIEQ) and in case of mills having distillation capacity have supplied ethanol as per revised schedule. However, production subsidy on actual cane crushing would be provided to sugar mills proportionate to their achievement on export and ethanol supply targets with equal weightage.

In June 2016, the Government has imposed 20 per cent customs duty on sugar exports to boost domestic supply and check prices and also imposed stock holding limits on sugar of 1000 MT for Kolkata and 500 MT for the rest of the country.

Opportunities & Threats

Sugar business is cyclical and is highly dependent upon the monsoon. Price of the sugar cane is beyond the control of the sugar mill and is announced by central Government. The sugar price realizations are also subject to market sentiments inconsistent with the fundamentals of actual demand and supply.

Delays in disbursement of cogeneration dues and recurring disputes on power tariff also pose a challenge to the management of cash flows.

Sugarcane Price

Government has retained the Fair and Remunerative Price (FRP) of ₹ 230 per quintal for 2016-17 season. The FRP will be linked to a basic recovery rate of 9.5 per cent, subject to a premium of ₹ 1.46 per quintal for every 0.1 percentage point increase in recovery above that level. For the sugar year 2015-16, FRP was ₹ 230/- per quintal linked to basic recovery rate of 9.5% subject to a premium of ₹ 2.32 per quintal for every 0.1 percent increase in recovery.

Tamil Nadu fixed a State Advised Price (SAP) ₹ 2,850 a tonne of sugarcane linked to 9.5 per cent sugar recovery for the 2015-16 sugar season (October-September), which the mills have declined to pay. This was ₹ 550 a tonne more than the mandatory Fair and Remunerative Price of ₹ 2,300 a tonne fixed by the Centre's Commission for Agricultural Costs and Prices (CACP).

Ethanol

After three years of formally mandating five per cent of petrol blended with ethanol, the country is set to achieve this target for the first time during the current sugarcane crushing season, i.e by the end of September.

In order to meet 10% blending, the Government needs atleast 260 crore litre every year. Another 80 crore litre is required for use in chemical industry and about 120 crore litres is needed for the IMFL industry. The annual availability is only 250 crore litre. Government is expected to come out with a new ethanol policy focusing on producing more ethanol.

Achieving the EBP (Ethanol Blending Programme) target may not be easy for mills in the State of Tamil Nadu, given that limits placed by the Tamil Nadu Government on the production of ethanol are far too low to meet the target of the EBP. Sugar mills in the State are currently permitted to sell no more than 50 lakh litres of ethanol, which is barely eight days' production.

At the same time, Tamil Nadu's taxation regime has rendered its sugar mills uncompetitive - a double whammy. A VAT of 14.5 per cent on alcohol in Tamil Nadu has resulted in higher imports of cheaper alcohol from sugar mills in Karnataka. As a result, sugar mills in Tamil Nadu are drowning with an unsold stock of alcohol.

Power Price

TNERC passed orders on 23/2/2016 and re-fixed the variable cost tariff for the surplus power evacuated to TANGEDCO grid by co-generation plants commissioned on or after 19/9/2008 with effect from 1.8.2012. The Gingee plant was commissioned on 9/10/2008. Fixed cost payable by TANGEDCO is calculated with respect to the date of commissioning and the variable cost is applicable for the financial year. The tariff for Gingee plant for the financial years 2016-17 and 2017-18 is as follows up to 55% PLF.

| Period | Fixed cost ₹ Per unit | Variable cost ₹ per unit | Total Rate ₹ per unit |
|-------------------------|--------------------------|-----------------------------|--------------------------|
| 1/04/2016 to 9/10/2016 | 2.16 | 2.76 | 4.92 |
| 9/10/2016 to 31/03/2017 | 2.10 | 2.76 | 4.86 |
| 1/04/2017 to 9/10/2017 | 2.10 | 2.89 | 4.99 |
| 9/10/2017 to 31/03/2018 | 2.05 | 2.89 | 4.94 |

It is to be noted that if the plant operates beyond 55% PLF the price payable by TANGEDCO would be ₹ 0.25 per unit as incentive plus variable cost for that financial year. There is no season and off-season classification for this Gingee Plant.

Our two units in Theni and Mundiambakkam which were commissioned prior to 2006 were getting a rate of ₹ 3.15 during season and ₹ 3.01 during off season. The rates were up for revision since 2010.

TNERC passed order in P.P.A.P No. 8 of 2011 on 31.3.2016 and re-fixed the tariff effective from 21.11.2011. In the said order TNERC implemented two part tariff ie fixed cost and variable cost. By the said order TNERC arrived fixed cost as ₹1.23 for 20 years of operation from the date of commissioning and ₹ 0.84 from 21st year onwards till the useful life of the plant.

TNERC in its comprehensive Tariff order No. 4 dated 31.3.2016 fixed the variable cost for the financial year 2016-17 and 2017-18 at ₹ 2.76 per unit and ₹ 2.89 per unit respectively.

Our unit in Theni is entitled to a tariff of ₹ 3.60 per unit and ₹ 3.73 per unit for the season 2016-17 and 2017-18 respectively. Our unit in Mundiambakkam is entitled to a tariff of ₹ 3.99 per unit and ₹ 4.12 per unit for season 2016-17 and 2017-18 respectively. For the offseason 90% of season rates are payable.

Outlook

The growth in sugar consumption and the bleak production patterns suggest a beginning of a deficit era in sugar industry globally and prices have started rising. The global availability of sugar for season 2016/17 and the policy decision in India will have a bearing on the prospects of the industry in the subsequent years.

Risks and concerns

Your company continues to review and manage the risks emanating from such a dynamic environment at periodic intervals. The major risks faced by the industry include sugarcane availability, price realization and regulatory control by Government and financial liquidity amongst others.

Sugarcane availability

Sugarcane is the main raw material in sugar mills. Sugarcane cultivation is monsoon dependent. Hence it becomes unpredictable in adverse climatic conditions. Similarly other factors like scarcity of harvest labour, lower sugarcane price, availability of attractive competitive/alternate crops will have a direct impact on cane availability and affect our business.

Risk mitigation: The Company has mitigated this risk by following:

- Continuous yield improvement activities to obtain a better quality cane leading to a better recovery.
- Close monitoring of cane development activities, which includes supply of good quality seeds, fertilisers and manure, among others.
- Promoting drip irrigation.
- Testing new improved varieties of cane.
- Careful monitoring of cane planting and harvesting schedule.
- Introduction of mechanical harvesters.
- Maintaining good relationship with farmers.

Sugar price realization risk

Sugar being a commodity, the sugar price remains volatile and realisations get adversely affected during a downturn. Coupled with this, higher cane price too affects profitability.

Risk mitigation: To address the challenge of cyclicity in the sugar business, the Company has adopted an integrated business model manufacturing sugar and also producing alcohol and cogenerating power from the sugarcane residue viz., molasses and bagasse. The Power and Alcohol business enhances the profitability of the company and de-risks the business from the adverse movements of sugar price. While Unit I (Varadarajnagar) is already an integrated complex, we have now made Unit II (Mundiampakkam) and Unit III (Semmedu) also integrated complexes with the commissioning of a state of the art multi-pressure alcohol distillation plant.

The Company is also focusing on improving direct sales to institutional buyers to lock down on prices, thereby balancing the volatility of the market.

Regulatory risk

The sugar industry continues to be regulated by State Governments by other controls viz., reservation of cane area and fixing sugarcane price.

Risk mitigation: Indian Sugar Mills Association (ISMA) and South Indian Sugar Mills Association (SISMA) of which the Company is a member are in the process of presenting recommendation for appropriate policy changes to reduce governmental influence in the sugar sector and work toward complete decontrol of the sugar industry.

Financial liquidity risk

Sugar industry is highly working capital intensive. Raising adequate and rightly-priced working capital or arranging funds for payment of the interest and principal with respect to loans availed might pose challenge. The other associated risk is soaring interest rates.

Risk mitigation: The Company had already undertaken a debt restructuring exercise under the Corporate Debt Restructuring (CDR) mechanism duly approved by CDR Empowered Group.

With the active support of our secured lenders, the approved CDR Proposal was put into implementation as a result of which the risks associated with repayment obligations of principal debts and interest has been deferred. This measure gives your company to have more disposable liquidity, during the moratorium period, for improving its performance and reducing risk associated with credit repayment.

Consequent to implementation of CDR Proposal, risks associated with interest rate fluctuation has been substantially mitigated with reduction of interest rate and fixing the interest rate regime on the term debts for a longer period. However, the CDR lenders would have a right of recompense for their sacrifices, at the time of Company's exit from CDR.

Internal control systems and their adequacy

The Company has a well-established internal control system in the form of well-documented policies, authorization guidelines commensurate with the level of responsibility and standard operating procedures, to ensure proper functioning of operations. Moreover there exists an effective internal audit system, commensurate with the requirements of the company.

The Board, Audit Committee and the Management review the findings and recommendations of the Internal Auditors and take corrective action, wherever necessary. Moreover the Audit Committee periodically interacts with Statutory Auditors and makes continuous assessments of the adequacy and effectiveness of the internal control systems.

Manpower

The Management staff strength as on 31st March 2016 is 217. The Non - Management staff strength as on 31st March 2016 is 671. The Sugar Wage Board Settlement signed on 08.10.2014 is valid up to 30.09.2018. Industrial Relations are cordial and healthy.

ANNEXURE - B TO THE AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Rajshree Sugars & Chemicals Limited ("the Company") as of 31 March 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Annexure - A to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Rajshree Sugars & Chemicals Limited ("the Holding Company") and its subsidiary company, as of 31 March 2016, in conjunction with our audit of the consolidated financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Holding Company and its subsidiary company are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

- ii) The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented to the extent possible, in the same manner as the Company's separate financial statements.
- iii) Goodwill represents the difference between the Company's share in the net worth of the subsidiary and the cost of acquisition of investment in the subsidiary. For this purpose, the Company's share of net worth is determined on the basis of the latest financial statements prior to the acquisition, after making necessary adjustments for material events between the date of such financial statements and the date of acquisition.
